# Technology of Secret Space Programs

- Without needing to unravel the UFO topic, the important fact of UFO research: the **government has suppressed many** forms of advanced **technologies**, including advanced **energy** generation systems, **anti gravity** systems & healing technologies
- US **Patent** & Trademark Office reports that thousands of patents have been **classified** for “national security” reasons
- **Inventors** who rediscover are often **intimidated, bought out or mysteriously die**
- **Bottom line:** already proven free energy technologies could address: pollution, poverty, homelessness, and the widening gap between the rich and poor

## The Attractions of Magnetism

*Could a Little Child Be Leading Us to a Free Energy Future?*

**T**he search for new energy technology takes us to northern Idaho to meet a ten-year-old girl who won a science fair with a battery-charging motor. She describes it as an advanced design that extends the life of batteries for an amazing length of time. The motor was designed by John Bedini and built by her. We meet him first.

More widely known as an audio-amplifiers expert, Bedini's name is intertwined with "free energy" history. Witnesses saw his machines running successfully, but later others were unable to build devices according to his published instructions. His circuitry was mentioned favorably at a conference in Switzerland recently.

Aware of the controversies, with mixed feelings I drove into the Idaho panhandle, past a warehouse for survivalists' supplies. My hope is that he will give clues so others can duplicate his successes.

Explaining his theory about such devices, new-energy theorist Thomas

music. After a six-year struggle, Bedini was granted US Patent 5,487,052 for a

with no return paths for the magnetics. The funny thing was that her father

oscillating, optical-electronics, and hopes that even structural metals can eventually be treated with it to reduce stress defects. Is this negative entropy—self-ordering in the physical world?

Bearden adds that most really *new* things are invented not by academic teams or corporate scientists but by the lone "independent, fiercely creative people."

I meet Bedini at his business, surrounded by electronics equipment. The back room looks like a museum of small prototypes of unusual motor/generators. Some are pictured on websites <http://rand.nidlink.com/john1> or <http://www.icehouse.net/john1/tesla.html>.

He says his knowledge is on the internet, and now it's up to others to build the devices. He says they have to experiment themselves, and it reminds me that he taught a little girl how to make a motor which drove science teachers nuts—to see a little motor made of plastic

# Classified Technology Example: “Dr B.” Engineer

- “Someone from NASA Ames ... took me to dinner...
- \$50,000 grant [to] come up with an idea to **cut down wind resistance** on **commercial airliners** to get better fuel economy out of a jet.
- “[Sent plans to] make the [737 plane] engine a **flame jet generator**, because it's a very great source of static energy. There are millions of ergs of electricity being
- “[you can] put a positive charge across the front ... the wings. We'll put a negative charge on the trailing surfaces ... We'll use Mylar as insulation. We'll use platinum rhodium plates [for positive charge].
- ....it'll **shoot out a positive charge of particles out in front** in a trail, so it'll cut the **wind resistance** to almost nothing in the 737

# Flame Jet Generator Application

- “I sent him some drawings. And the guy calls me back in a week and says... “this is way beyond what we wanted from you. **He says we can't do this.** We can't do this.”
- I said, why not? It'll work. He says, yes it'll work, but **we didn't want anything this technical.** [I found this] really weird, this conversation.
- [Later from Mark Mcandlish] ... found out he designed the **front-edge of a B-2 Bomber**, which goes supersonic... it freaked them out, because I gave them a **classified design**...

# Stan Meyer, Springs Inventor (1940 – 1998)

- 1998 died at a restaurant, claimed ‘They **poisoned** me’

# Seymour Cray (1925 – 1996)

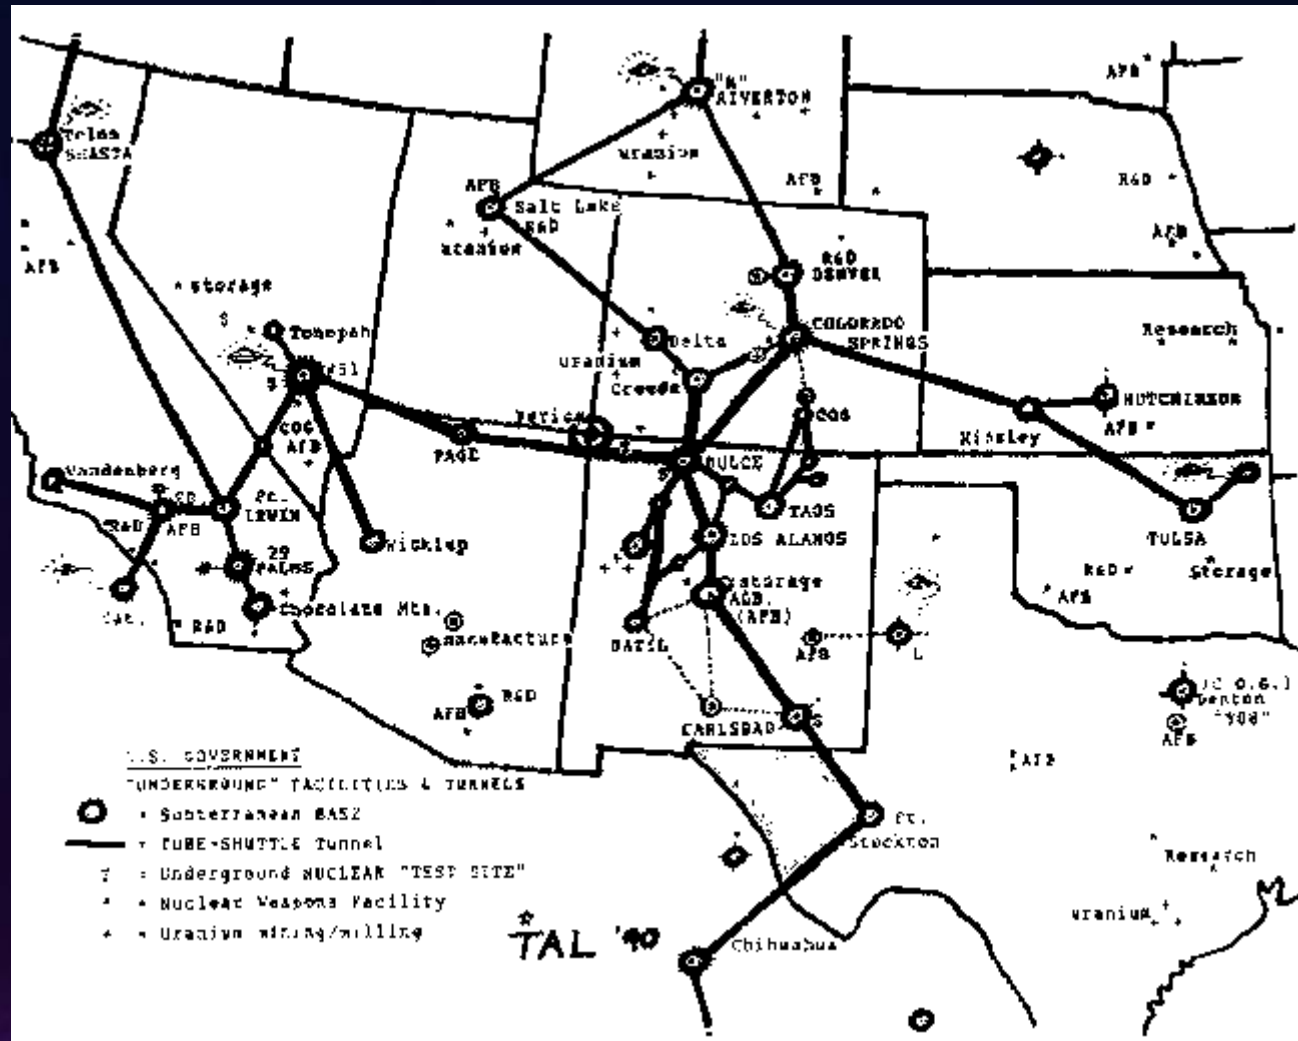

- Gallium Arsenide chip technology formed "Cray 3" super computer - headquartered in Colorado Springs

- Dr. Bill Deagle claimed Cray Computer tech was taken and **classified by the US Air Force**, and that it was developed much further than is publicly known, and that he witnessed a "Cray 5" computing array in operation.
- Deagle claimed that Cray died in a mysterious car crash, possible assassination
